To whom it may concern:

It is with great confidence that I put forward this recommendation of SWP Construction and its Principal, Bobby Lall. Most recently, we engaged SWP to deliver a variety of individual projects on the most high-profile manufacturing project in the United States, for a confidential client.

What you can expect from SWP is a streamlined, honest process built upon open communication and thorough market/industry knowledge that dramatically simplifies the construction process. They are a partner to be relied upon from the start of a project, in the concept/budget development phase, through punch out, and on through the life-cycle of the facility or structure.

As the largest contractor of our type in the United States, we are very particular about our sub-consultants and sub-contractors, and engage in heavy due-diligence. Before engaging SWP, we learned from everyone we spoke with of the commitment that they have made in developing lasting relationships built upon integrity and mutual respect. Their commitment to quality and understanding of the importance of a cohesive design makes them a great partner in arriving at solutions to budget constraints, helping to meet the financial, functional and aesthetic goals of a project. They are proven stewards of an owner's money, steadfastly adhering to strict budget constraints and schedules.

I welcome any specific inquiries to support my recommendation of SWP.

Regards,
